

Ari Eaton

Quantitative Analyst – eFX Trading

Boston, MA aeaton@wesleyan.edu [linkedin.com/in/ari-eaton](https://www.linkedin.com/in/ari-eaton) [arieton.com](https://www.arieton.com)

WORK EXPERIENCE

State Street
AVP, Quant – eFX
Quant – eFX

Jun 2025 – present · Boston, MA
Sep 2026 – present
Jun 2025 – Sep 2026

- Optimized FIX session handling, reducing disconnects by 80%+ and eliminating associated resubscription overhead across currency pairs and tenors, while reducing operational risk from trade timeout incidents.
- Created AI bot infrastructure on an MCP server and the State Street AI API, automating operational processes like position checks and opening access to proprietary data for non-technical users.
- Built a scalable framework for AI-powered applications on TickDB, enabling rapid iteration and deployment of future intelligence tools.
- Optimized skew class calculations, reducing latency and improving accuracy in real-time quoting.
- Led automated monitoring and reporting enhancements across trading systems, reducing manual oversight and improving operational visibility.
- Conducted self-guided research on signal generation and optimization, identifying ways to improve portfolio performance.
- Pitched a new business opportunity leveraging existing database infrastructure to senior leadership.

State Street
Professional Development Program

Jul 2024 – Jun 2025 · Boston, MA

- **eFX Market Making**
 - Implemented and evaluated a high-frequency autoregressive model.
 - Implemented Symphony API integration enabling real-time data access and interaction within the messaging platform.
 - Designed analysis tools to automate pricing evaluation and improve reporting efficiency.
- **eFX Benchmarks**
 - Improved tooling for benchmarking execution performance and market selection effectiveness.
 - Developed a visualization framework to streamline signal generator testing and validation against production standards.
 - Built a backtesting tool to analyze parameter changes and quantify PnL outcomes, enabling data-driven optimization of execution strategy.

State Street
Intern

Jun 2023 – Aug 2023 · Cambridge, MA

- Used MATLAB to research and backtest an EM FX hedging strategy based on a deployed G10 approach.
- Worked with the Indirect and StreetFX sales teams to automate a daily task in Python, saving 5 hours a month.
- Combined proprietary indicator data with industry-standard signals to produce the August FX Hedging Monitor publication.

EDUCATION

Wesleyan University
B.A., Computer Science

2024 · Middletown, CT

- Minor in Integrated Design, Engineering, and Applied Science (IDEAS). Ski team captain.

PROJECTS

poker Play poker against a computer that's actually good at it. [arieton.com/poker](https://www.arieton.com/poker)

battleship Play battleship against a computer, with a helper that tells you where to shoot next. [arieton.com/battleship](https://www.arieton.com/battleship)

good boy A very small page about a very good boy. [arieton.com/goodboy](https://www.arieton.com/goodboy)

SKILLS & INTERESTS

Technologies Java, JavaScript / HTML / CSS, Python, React, MATLAB

Interests Backpacking, climbing, snowboarding, skateboarding, ice skating, biking, camping

HONORS
